CERTIFICATION PROGRESS

SWC shall initially review the client enquiry and send them a questionnaire for their completion. Based on the completed questionnaire from the client SWC will take a decision for certification, for which a quote will be sent to the client for 3 years of certification period. Key steps in our approach are:

- Contract signature
- Pre-audit (optional): gap analysis and diagnosis of your systems current position against requirements of the standard;
- Audit Stage 1- Initial Visit: to verify the establishment and implementation of the basic structure of your Management System
- Audit Stage 2 - Certification audit (certificate issued after successful certification audit);
- Surveillance audits to follow the continual improvement;
- Re-certification after 3 years through full audit or continual assessment.

**CERTIFICATION PROGRESS

CERTIFICATION POLICY

The Management of SWC Certification aspires to encourage awareness, impose environmental obligation, ensure safety & health and assist to continually enhance certification management issues within industry, trade and the community. We realize the significance of impartiality in carrying out our management system certification activities, handle conflict of interest and ensure the objectivity of our management system certification activities. We desire to accomplish our goals as a major worldwide accredited certification body. The reality that we understand in a good business sense involves, effective management of our customers, personnel and certification process. It will be a basic and essential component of our business approach.

This is accomplished through:

- Providing an worldwide certification program in compliance with ISO 17021 which is unbiased and objective to all who desire to avail themselves of our service
- Delivering the customers with a professional service that is recognized to add benefit to their enterprise and satisfy their expectations,
- Caring for and valuing our personnel educate our personnel to deliver Audits that satisfy our clients, supervisory body and the requirements we set,
- Building an open exchange of information and facts with organizations and the community on the certification service that we provide,
- Constantly enhancing the certification service in various perspectives
- Exercising sound organization concepts to handle the certification body and provide a return on our share holder's investment
- Communicating this policy to our personnel, customers and interested people.

HSEQ POLICY

Our long-term achievements is dependent on our capability to constantly enhance our service while safeguarding our people and the atmosphere in which we work.

IT IS OUR POLICY TO:

Provide and make sure a safe operating environment, conditions and equipment, combined with instruction that will provide our employees with the understanding and details required to safely carry out their assigned duties;

Make certain that our services are carried out in such a method as to safeguard the environment and, where possible, assist clients to do the same;

Fulfill or surpass our clients' anticipation, the first time and every time, through the application of proven quality guidelines at all levels of our service delivery process, while being guided by the our Code of Ethics and Professional Conduct.

WE ARE DEDICATED TO:

- Safeguarding the health and safety of our employees, customers and third parties;
- Safeguarding our environment and that of the communities where we work and live;
- Enhancing the quality of our services and service delivery.

The QHSE policy will be incorporated at all levels and is the responsibility of management with the active support of all our staff.'

IMPARTIALITY, INDEPENDENCE & INTEGRITY

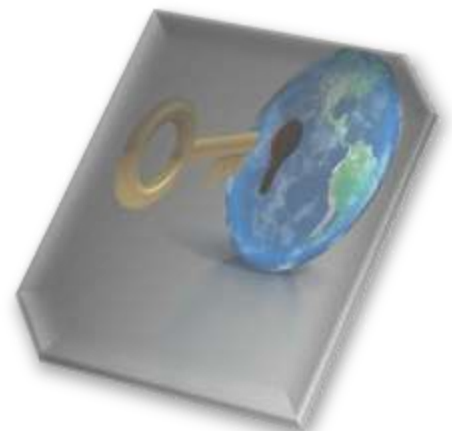

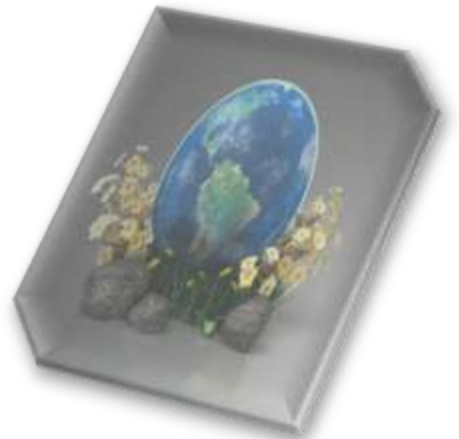

SWC has top management committed to impartiality in its management system certification activities SWC will have a publicly available statement that SWC understands the importance of impartiality in carrying out its management system certification activities, manages conflict of interest and ensures the objectivity of its management system certification activities.

SWC will identify, analyze and document the possibilities for conflict of interests arising from provision of certification including any conflicts arising from its relationships via an FMEA risk assessment matrix and risk assessment procedure. Having relationships does not necessarily present SWC with a conflict of interest, However, if any relationship creates a threat to impartiality, SWC will document and be able to demonstrate how it eliminates or minimizes such threats. This information will be made available to the committee specified in 6.2. The demonstration will cover all potential sources of conflict of interests that are identified, weather they arise from within SWC or from the activities of other persons ,bodies or organizations and will be demonstrated in an FMEA risk assessment matrix .

SWC Quote: 'Managing Assurance with Confidence'

SWC has achieved great recognition in the certification industry, particularly from the business and industry community the world over. This reflects our utmost dedicated service to our clients. SWC complies with International Norms and Principles of a certification body that offers ISO certification. SWC style to offer certification services will fall in line with the customer needs and the International Principles.

SWC also uses scientific use of modern Certification Techniques and approach.

ACCIDENT INVESTIGATION

Accidents occur when hazards escape detection during preventive measures, such as a job or process safety analysis, when hazards are not obvious, or as the result of combinations of circumstances that were difficult to foresee. A thorough accident investigation may identify previously overlooked physical, environmental, administrative or process hazards, the need for new or more extensive safety training, or unsafe work practices. The primary focus of any accident investigation should be the determination of the facts surrounding the incident and the lessons that can be learned to prevent future similar occurrences.\

MAN LIFTS & SUSPENDED CRADLES

ELEVATOR'S

Elevators are high-tech equipments which must function safely.

Modern life would be inconceivable without elevators. They ensure comfortable passenger transport in multi-storey residential buildings or offices and safe and rapid control of passenger flows in airports or railway stations.

If you operate elevators, you are also responsible for their safety.

A quality assurance program spanning the entire construction process helps builder-owners and property developers observe all relevant quality standards and order specifications. This minimizes defects, malfunctions or failures, prevents unnecessary costs and avoids personal injuries.

We are offering:

- Assessment of the correct adjustment of the safety gears (no test weights required)
- Quantitative determination of the traction (no test weights required)
- Recording of speed/time and instance/time diagrams
- Determination of deceleration profiles or ravel quality characteristics
- Verification of the function of the re-leveling device (hydraulic elevators - no test weights required)
- Judgment on the adjustment of hydraulic safety valves
- Recording of pressure / time diagrams
- Correct measurement of actual physical values (mass of car and counterweight, rated speed, travel distance, etc.)
- Determination of kinematical properties of elevator doors.

ESCALATOR'S

Escalators are high-tech equipments which must function safely:

Modern life would be inconceivable without escalators. They ensure comfortable passenger transport in multi-storey residential buildings or offices and safe and rapid control of passenger flows in airports or railway stations.

If you operate escalators, you are also responsible for their safety. A quality assurance program spanning the entire construction process helps builder-owners and property developers observe all relevant quality standards and order specifications. This minimizes defects, malfunctions or failures, prevents unnecessary costs and avoids personal injuries.

we helps you live up to your responsibility!

We are offering you comprehensive and qualified testing, certification and advisory services.

You will get the best experts and state of the art services in the City at the most convenient prices.

Your Advantages:

Modern measuring procedures enable experts to conclude qualified technical statements, to identify wear and defects in an early stage and thus help to extend the availability and life time of technical plants and installations

SUSPENDED ACCESS EQUIPMENT'S

Suspended Access Equipments are high-tech equipments which must function safely.

Modern life would be inconceivable without Suspended Access Equipments. They ensure maintenance access in multi-storey residential buildings or offices towers.

If you operate suspended access equipments, you are also responsible for their safety. A quality assurance program spanning the entire construction process helps builder-owners and property developers observe all relevant quality standards and order specifications. This minimizes defects, malfunctions or failures, prevents unnecessary costs and avoids personal injuries.

SWC helps you live up to your responsibility!

We are offering you comprehensive and qualified testing, certification and advisory services.

You will get the best experts and state of the art services in the City at the most convenient prices.

Your Advantages:

Modern measuring procedures enable experts to conclude qualified technical statements, to identify wear and defects in an early stage and thus help to extend the availability and life time of technical plants and installations.
